About the Authors

PAOLO BELLAVITE is a medical doctor specializing in hematology who has been an Associate Professor of General Pathology at Verona University Medical School in Italy since 1984. He completed a post-doctoral degree in biotechnology at the Cranfield Institute of Technology in Bedford, U.K., is a member of the European Society of Clinical Investigation, and is a founder of the Observatory for Complementary Medicine at Verona University. Dr. Bellavite has published more than 150 papers in medical and scientific journals on inflammation, free radicals, leukocyte biology, and cellular pharmacology. He is currently involved in the investigation of the scientific basis of homeopathy and the integration of leading alternative therapies into mainstream medicine.

ANDREA SIGNORINI holds a medical degree with specialization in Clinical Biology from the University of Verona. He completed studies at the Verona Homeopathic School and has worked as a practitioner in the field since 1986. He currently teaches homeopathy at the Homeopathic Medical School of Verona and is director of the Scientific Department in the Italian Federation of the Homeopathic Medical Association. Since 1998 Dr. Signorini has worked towards proving homeopathic methodology. He has recently published accounts of the proven efficacy of remedies, including *Hypericum* (St. John's Wort) and *Piper methysticum* (mint).
